THE END OF OPERATIONAL OVERHEAD

One person.
The output of an entire team.

GRID is the operating system for organizational intelligence —
adaptive environments, self-correcting workflows, and an AI that reasons across everything.

Nicole · Founder

$350K target · $500K hard cap

THE PROBLEM

Every knowledge company drowns in coordination overhead.

A 50-person company spends $600K+ per year on roles whose entire purpose is moving information between humans: project managers, ops analysts, content coordinators, social managers. They exist because no system maps the work itself — only the meetings about it.

$600K

wasted per 50-person org

on coordination roles alone

32h

per content piece

research → draft → review → publish

62%

of PM time

is synthesizing status updates

0

single source of truth

across tools, sheets, inboxes

Better AI does not fix this. More tools do not fix this. Only structure does.

When intelligence becomes infinite, structure becomes the only advantage.

AI performance is a function of environmental structure, not model capability. Better models do not fix broken systems. More data does not create alignment. Only structure does. GRID encodes this into software.

THE GRID EQUATION

$$S = f(Id, If, In)$$

Identity — constrains

Infrastructure — enables

Intelligence — adapts

Three variables. One equation.

GRID is the structure layer for AI-native work.

Your organization becomes a system of adaptive environments — each a live dashboard of widgets that replace meetings, spreadsheets, and status updates.

01

Environments

Organizational containers — Operations, Marketing, Product. Each adapts to its team. White-label ready.

→

02

Systems

Structured functions inside environments. Health monitoring, goal tracking, intelligence — computed from real data.

→

03

Workflows

Multi-stage executable processes. Nova runs each stage, validates output, and delivers real artifacts — not summaries.

Nova is not a chatbot.

It is a constraint engine that reasons across your entire org.

Nova reads every system, every workflow, every signal — and acts. It generates reports, triages incoming work, executes multi-stage workflows, and validates every output against your identity constraints.

Nova uses 11 operational tools and streams execution in real time. Every run is auditable. Every cost is capped.

CAPABILITIES

- Cross-system reasoning
- 11 operational tools
- Quality validation scoring
- Memory + context retention
- Real-time streaming execution
- Automatic signal triage
- Per-tenant cost circuit breakers
- GDPR-compliant erasure + export

Attention, not notifications.

Signals, failed executions, at-risk goals and unhealthy systems — ranked into one focus stream. Built on tenant-isolated Prisma queries. Renders in <50ms.

grid.work · Home

WORKSPACE

Welcome back, Nicole

ATTENTION

What to focus on right now

SIG	URGENT: ContentOS pipeline failure	94
RUN	Social Campaign: Q2 Launch	88
GOAL	Close 3 design partners	72
SYS	Analytics System	58

Every department. One system.

GRID absorbs the coordination work across four categories of knowledge org, with shipped workflow templates for each.

MARKETING

Social Media Campaign

```
Narrative → Assets → Review → Publish
```

Full multi-platform campaign in 3 minutes. Instagram, Facebook, LinkedIn — copy, scheduling, analytics.

CONTENT

Blog Post Pipeline

```
Research → Draft → Review → Publish
```

SEO-optimized posts from brief to publish-ready. Nova writes, validates, and prepares metadata.

OPERATIONS

Client Onboarding

```
Discovery → Setup → Training → Handoff
```

Structured onboarding that self-reports progress. Health scores track client engagement in real time.

ENGINEERING

Sprint Cycle

```
Planning → Development → Review → Deploy
```

Sprint planning generated by Nova. Velocity tracked. Blockers surfaced automatically from signals.

Who GRID replaces on day one.

Three archetypes we are onboarding in the closed alpha. Each represents a different cost curve GRID collapses.

SOLO OPERATOR

The content founder

WHO

Solo marketing founder, $8K/mo ad spend, publishes 3× / week

PROBLEM

Needs a 3-person content team to stay consistent

WITH GRID

Runs 1 content workflow, publishes on 4 platforms automatically, reviews Nova output in 10 min/day

Replaces: $18K/mo in fractional content hires

MID-MARKET OPS

The 50-person knowledge org

WHO

50-person services firm, 3 PMs, 2 analysts, 1 ops lead

PROBLEM

Coordination overhead eats 30% of senior time

WITH GRID

Replaces PM status layer + analyst reporting with live GRID environments per client

Replaces: $600K/yr in coordination roles

AGENCY / WHITELABEL

The agency reseller

WHO

Marketing agency managing 12 client accounts

PROBLEM

Each client needs custom dashboards the agency has to build

WITH GRID

White-labels GRID per client, brands with client logo + color, bills $299/environment

Adds: $43K/yr margin on 12 clients

We are not sizing the SaaS market.

We are sizing the labor budget we replace.

TAM

Global coordination labor

$2.1T

PMs, ops, content, social — annual salary spend across all knowledge orgs

SAM

English-speaking SMB + mid-mkt

$310B

Companies 10–500 where a single founder can buy without procurement

SOM

5-year capturable

$180M

18K seats × $99/mo average at 1% SAM penetration — conservative floor

Every % of knowledge-work coordination we absorb = 10× the per-seat SaaS alternative.

Two years. One founder. Shipped.

GRID is already in production. Every system below is live in the repo, hardened, and running on a single founder's infrastructure.

2 yrs
Bootstrapped solo
Zero outside capital

11
Nova operational tools
Shipped and auditable

44+
API routes, tenant-isolated
GDPR Art 17 + 20 compliant

$0
Burn to date
One Anthropic account as sole resource

SHIPPED

What is live today

- Multi-tenant architecture with ownership guards across every route
- Nova constraint engine: 11 tools, streaming execution, quality validation
- Session auth hardened (sameSite strict, CSRF defense, rate-limited)
- GDPR Article 17 erasure + Article 20 portability flows
- Upstash Redis distributed rate limiting (fail-open to in-memory)
- Attention-ranking home widget, signal triage, goal tracking
- Daily encrypted Postgres backups via GitHub Actions
- Per-tenant daily cost circuit breakers ($10/day default)

Four tiers. Margin protected at every level.

Median user costs us ~$22/mo at current Anthropic rates. Per-tenant daily caps enforce a worst-case ceiling. Gross margin stays above 78% in the worst case and above 92% at the median.

HOBBY

Free

1 user · 1 environment

Acquisition funnel

- ✓ $2 / day AI cap
- ✓ Nova with 5 tools
- ✓ Community support
- ✓ Public-template workflows

STARTER

$39 /user / mo

Up to 5 seats · 1 environment

~44% GM

- ✓ Nova with 11 tools
- ✓ $10 / day AI cap
- ✓ Signals · goals · workflows
- ✓ Email support

GROWTH

$99 /user / mo

Up to 50 seats · 5 environments

~78% GM

- ✓ Everything in Starter
- ✓ $50 / day AI cap
- ✓ Custom workflows · API · webhooks
- ✓ Priority support

ENTERPRISE

$299 /user / mo

Unlimited · White-label

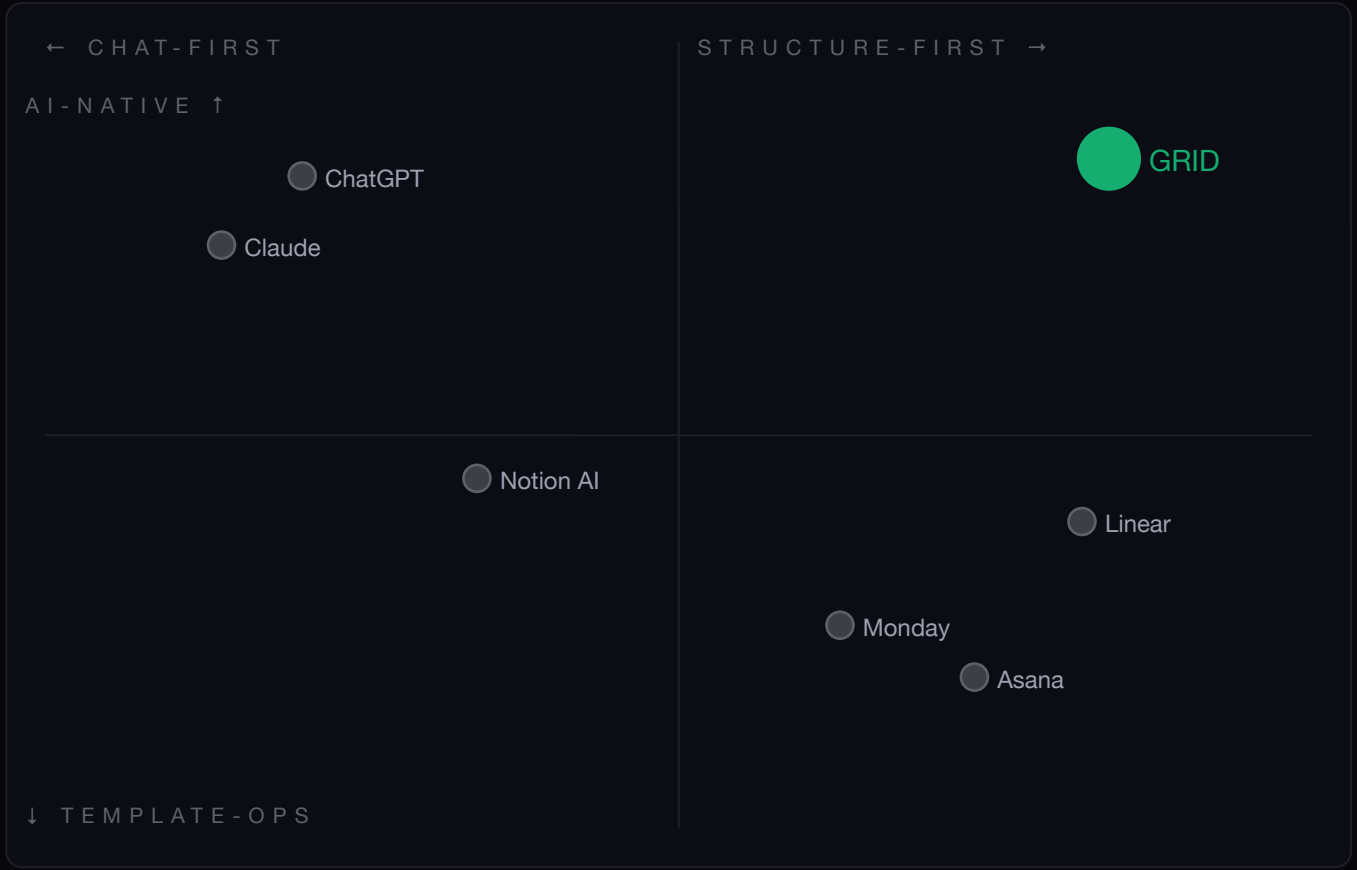
~92% GM

- ✓ Everything in Growth
- ✓ White-label branding · SSO
- ✓ Audit logs · custom AI caps
- ✓ Design partner SLA

ADD-ONS

- Annual billing –20%
- Extra AI cap $0.02 / 1K tok
- SSO add-on $500 / mo
- White-label env $299 / env / mo

Everyone is building chat. We are building structure.



WHY WE WIN

Structure as thesis

The only ops tool whose core claim is that models do not matter — structure does. A hard-to-copy point of view.

Multi-tenant by default

44+ routes behind ownership guards from day one. Competitors bolt this on years later.

Identity constraints

Every output validated against a tenant identity. Alignment becomes a built-in property, not a prompt.

White-label at the seat level

Agencies can rebrand GRID per client. Distribution wedge competitors cannot match without a rewrite.

One founder. Full stack. Two years in.

N

Nicole

Founder · Engineer · Designer

Built GRID end-to-end over 24 months with no outside capital. Architected the multi-tenant data model, the Nova constraint engine, the workflow execution layer, the auth perimeter, and the entire design system. Background in product design and engineering. Operator-builder, not a manager-founder.

POST-RAISE HIRING PLAN

- Technical co-founder or senior eng #1 — Month 1
- GTM / design partner lead — Month 3
- Founding designer (contract → FT) — Month 6

Month 14

When intelligence becomes infinite, structure becomes the only advantage.

nicole@grddd.com

Build the structure layer before the intelligence layer locks in.

The next 18 months decide whose structure the agent layer runs on. Every month that passes, Notion, Monday and the LLM vendors compound lock-in with shallow structure. GRID is the only system whose core thesis is that structure matters more than the model.
